Executive Summary

The assessment identified 1 Critical, 1 High, 1 Medium, and 0 Low severity findings across 2 assets. The average CVSS score across all findings is 7.9, and the overall organizational risk is assessed as Critical.

Overall Risk Rating: Critical
3 Total Findings
2 Assets Reviewed
14 Days Engagement Duration
01 Jul 2026 - 14 Jul 2026 Testing Period

Findings by Severity

Severity	Count
Critical	1
High	1
Medium	1
Low	0
Informational	0

Key Risk Areas

- Critical systems exposed to remote attack.
- Weak authentication identified on multiple assets.
- Several outdated services require immediate patching.

Priority Recommendations

1. Patch all Critical vulnerabilities immediately.
2. Implement MFA across administrative accounts.
3. Perform continuous vulnerability scanning.

Enterprise Security Assessment Overview

Overall Security Score

Executive Assessment

73
/100
Security Grade C

Overall Risk High
Average CVSS 7.9
Security Maturity Defined
73%

Executive Interpretation

The assessment indicates an overall **High** risk posture. The calculated security score is **73/100** which reflects the current cyber security maturity of the assessed environment. Immediate remediation should prioritize Critical and High severity findings to reduce enterprise exposure.
